POSIZIONAMENTO DEL PIATTO DOCCIA

Per un posizionamento ideale del pannello doccia, il getto superiore deve essere posizionato a un'altezza complessiva da terra di 210 cm. Dunque bisogna lasciare circa 110 cm da terra alla parte bassa del pannello doccia.

UTENSILI NECESSARI

Matita

Cacciavite

Trapano

Metro a nastro

Martello di
gomma

Chiave inglese
22-24

Guarnizione

MONTAGGIO

1° PASSAGGIO

1. Posizionare la colonna doccia sul muro.
2. Con una matita tracciare i fori da praticare.

2° PASSAGGIO

1. Con il trapano praticare i fori a muro.

3° PASSAGGIO

1. Inserire i tasselli
2. Posizionare il gancio di fissaggio e con le viti assicurare il gancio al muro.
3. Collegare tutti i pezzi alla presa acqua, inserendo le guarnizioni.

4° PASSAGGIO

1. Montare il soffione
2. Avvitare il doccino al flessibile (inserendo la guarnizione).
