Conseil

Cela n'est pas obligatoire mais nous le conseillons :

Pour plus de robustesse, vous pouvez aussi utiliser du silicone ou du ruban adhésif entre les panneaux en polycarbonate et la structure en aluminium pour améliorer la stabilité.

Remarque : Le silicone et le pistolet à colle ne sont pas inclus parmi les outils. Vous pouvez les acheter en complément.

Utilisez, uniquement, du silicone adapté à l'aluminium.

EN

Advice

It is not necessary but we would advise:

For additional strength, you can also use some glue or tapes between the polycarbonate panel and the aluminum frame to enhance the stability.

Note: Silicone sealant and glue gun are not included in our tool kit. You can buy them locally.

Only use silicone sealant suitable for aluminum

ES

Aconsejo :

No es necesario pero aconsejamos:

Para más fuerte, se puede utilizar un poco de pegamento o cinta adhesiva entre el panel de polycarbonato y el cuadro en aluminium para mejorar la estabilidad.

Nota: Sellador de silicona y pegamento no están incluidos en nuestros kit de herramientas. Se puede comprarlos localmente.

Utilize exclusivamente sellador de silicona adecuado para el aluminium.

DE

Rat

Dies ist nicht obligatorisch, wir empfehlen es jedoch:

Für zusätzliche Festigkeit können Sie auch Silikon oder Klebeband zwischen den Polycarbonatplatten und der Aluminiumstruktur verwenden, um die Stabilität zu verbessern

Hinweis: Silikon und Klebepistole sind nicht im Lieferumfang enthalten. Sie können sie zusätzlich separat kaufen

Verwenden Sie nur Aluminium geeignetes Silikon

IT

Consiglio

Non è necessario ma è consigliato :

Per più resistenza, può usare silicone o un nastro adesivo tra i pannelli di polycarbonato e la struttura in aluminium per aumentare la stabilità della serra.

Nota : Il silicone e la pistola per la colla non sono inclusi ma possono essere comprati localmente.

Bisogna solo usare silicone che è adattato alla struttura in aluminium.
