

An Ideal Solution for Video Surveillance

This powerful DVR video surveillance system offers a completely affordable security solution for your home and business. You can install the cameras anywhere in or around your house with ease. And the system is able to stream crystal clear footage to your devices from day to night. Rest assured you can get reliable protection all the time with this camera system.

Crisp 1080P HD Footage

With twice more resolution than 720P, the security camera system presents the details you need in super clarity. You're allowed to capture all wonderful moments in or around your house with ease.

Powerful 5-in-1 System

This DVR supports TVI, AHD, CVBS, CVI as well as IP cameras, adding flexibility to your device connection and bringing you ease of mind. Because of its wide-range compatibility, you can take full advantage of your old cameras and add brand new cameras to it.

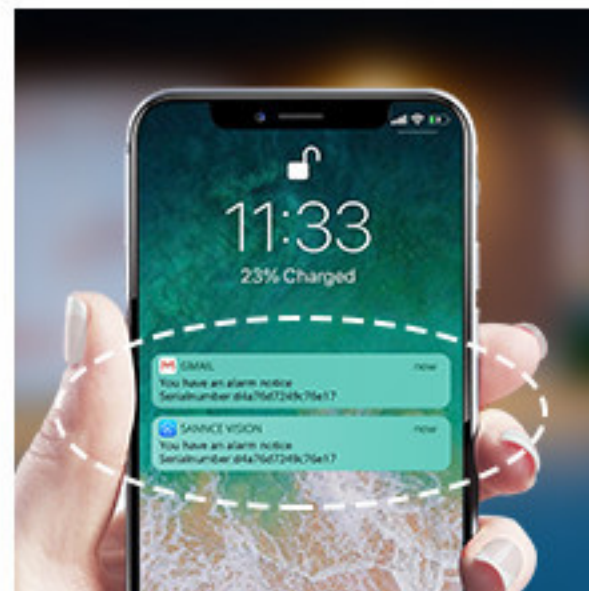

1080P Full Color Night Vision

With 2 built-in ultra-bright array LEDs, easily see things in great detail and presents true-to-life color no matter in the day or night. Full color distance covers up to 100ft/30m.

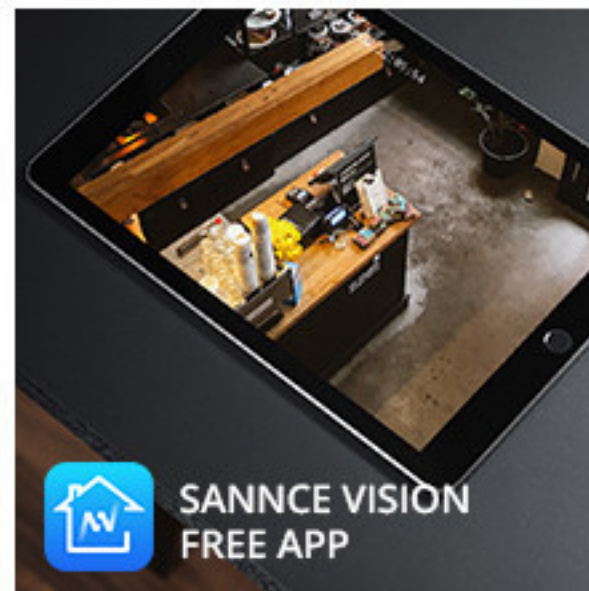

IP66 Weatherproof

Built with IP66 weatherproof housing fit for indoor and outdoor use, the cameras can withstand the most terrible climate that the mother nature brings. Just bring it on, whether it is rain, snow, sleet or wind, the cameras will never disappoint you.

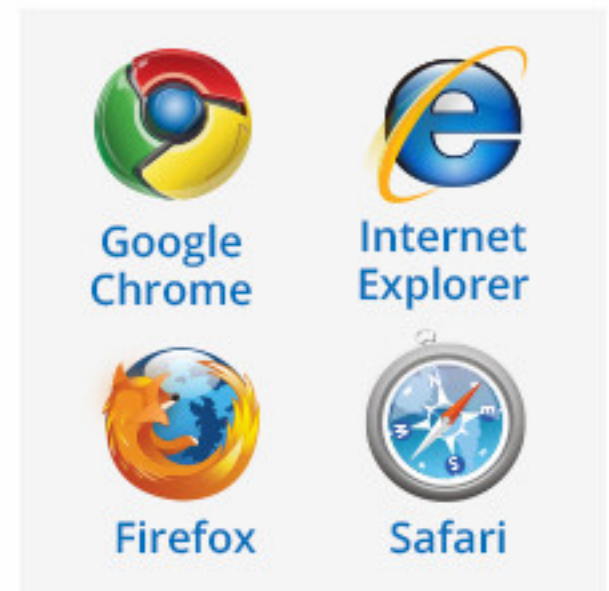

Motion-Triggered Alerts

With our powerful security system, you can mark out the vital areas for motion detection, like backdoor and garage. Whenever an intruder breaks into these areas, instant email alerts and APP push alerts will be sent to you right the first time.

Quick Remote Monitoring

Consolidating your security system into your smartphone, tablet and PC can be quite simple with our free viewing app. Download "Sannce Vision" on your mobile devices, quick scan the QR-code to add the system, then you can watch live video from anywhere in the world.

Multiple Browsers Viewing

Our system offers you various ways to access and control the cameras. Apart from mobile access via the app or client software, you can enjoy the pleasure to watch the monitoring video on the major web browsers like Chrome, Safari, Firefox and IE.
