

SANNCE®

Smart Home Security Made Easy

SANNCE 5MP POE NETWORK VIDEO SECURITY SYSTEM

Easy PoE Setup

H.264+
Compression

Motion
Triggered Alert

Remote Access

IP66
Weatherproof

With its exquisite design and exceptional functions, SANNCE PoE network video security system offers a perfect solution for your home and business surveillance.

Specifications:

PoE NVR:
Video Input: 8CH IP PoE Input
Video Output: HDMI/ VGA up to 1080P
Audio Output: Support
Max Recording/Playback Resolution: Up to 5MP (2560x1920)
Max Playback Channel/Capacity: 4CH/1CH@5MP
Onvif: Support Onvif Version 2.6
HDD/HDD Capacity: 1 SATA Interface/Up to 6TB Capacity

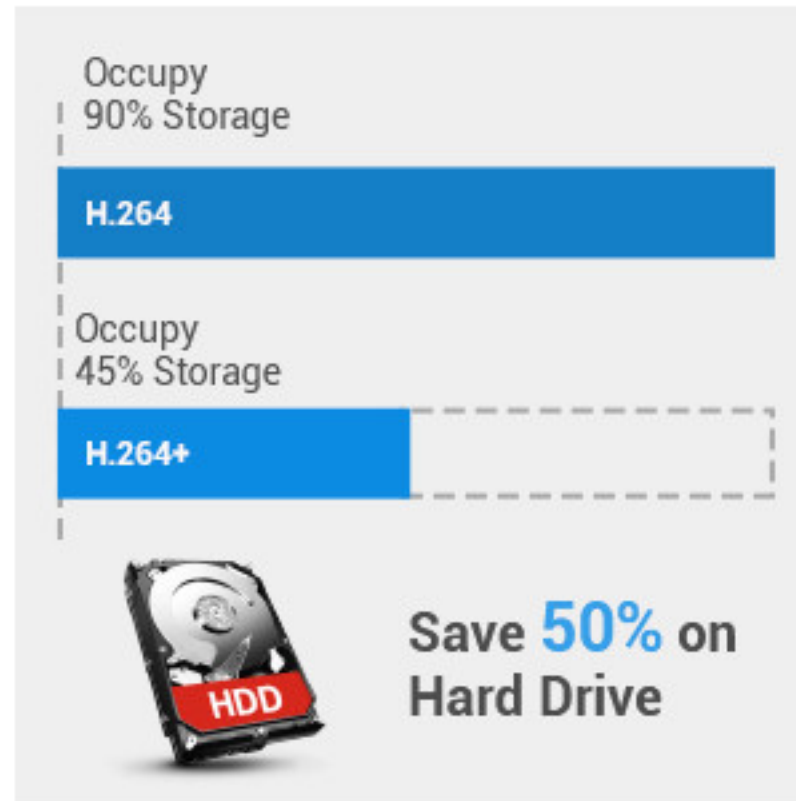

IP Camera:
Image Sensor: 1/2.7" Progressive Scan CMOS
Angel of View/Lens: 70°/ 3.6 mm
Number of Infra-Red LEDs: 36 pcs
Day and Night Function: Support IR-CUT
Night Vision Distance: Up to 100ft/30m
Wide Dynamic Range: Digital WDR
Operating Power: DC12V; PoE (802.3af)
Operating Temperature: -20°C – 60 °C (-4°F – 140 °F)

Notes: This product requires cabling. It is strongly suggested to test all products before installation.

Super Easy PoE Installation

These advanced PoE (Power over Ethernet) cameras are connected by only one network cable to both provide power supply and transmit video signals. This feature has greatly simplified the installation, reduced cost, and decreased the risk of electric leakage.

Advanced H.264+ Video Compression

Compared with H.264, H.264+ delivers smoother picture and saves up to 50% more disk storage space. It not only effectively reduces the delay in decoding and compression, but also ensures the stability and smoothness of the picture output.

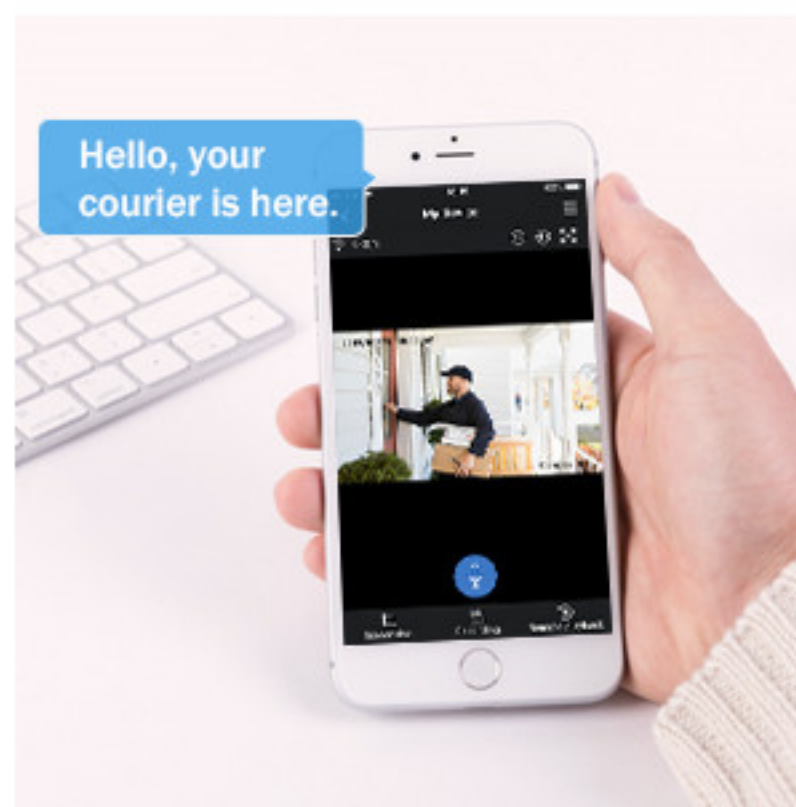

Smart Motion-Triggered Alerts

With our powerful security system, you can mark out the vital areas for motion detection, like backdoor and garage. Whenever an intruder breaks into these areas, instant email alerts with snapshots and APP push alerts will be sent to you right the first time.

Quick Remote Monitoring

Consolidating your security system into your smartphone, tablet and PC can be quite simple with our free viewing app. Download "Sannce Sight" on your mobile devices, quick scan the QR-code to add the system, then you can watch live video from anywhere in the world.

Capture Clear Voice Signal

The PoE IP cameras are equipped with a high-quality microphone which enables you to hear sound while watching videos. Whether your baby is crying or your dog is barking outside, you can hear everything very clearly.

IP66 Weatherproof Metal Housing

The security cameras are durable enough to withstand whatever mother nature brings, even in extreme temperature from -4°F to 140 °F. Encased in airtight heavy-duty metal housing, they have better heat dissipation performance and enjoy long service life.
