

Description

Very beautiful and durable Rabbit Hutch. Easy to assemble only requires one screwdriver.

- > Constructed of solid Fir Wood & Plywood & FS2 rainproof
- > Removable & Rainproof drawer & roof makes cleaning easy
- > Under Wire-nets provide enough elbow-room
- > Right-angle design can fit all of our other elements

Components Inside this box:

- 2 pcs Side Wall Sections for main room
- 1 pc Wire-nets Front frame Sections for main house
- 1 pc Back Wall Sections (made by plywood)
- 1 pc Rainproof drawer Section
- 1 pc Small door
- 1 pc Rainproof Roof Section
- 1 pc Small hole board
- 2 pcs Plastic Handle
- 11 pcs 2.5cm Galvanized Screw (Use to attach side wall, front frame and back wall)
- 4 pcs 1.2cm Galvanization Screws (Use to attach Small door hinge to front frame)
- 2 pcs 2.0cm Galvanized Screw (Use to attach stair to side wall section)

SAFETY NOTE:

Make sure screws are accurately inserted. Avoid the points of nails sticking into the living space of your pet; they could cause injury.

SOFTLY REMIND

Fir&plywood Sections may twist when unassembled, if you happen to meet this problem, do two steps as follow:

1. find out which surface is curved.
2. put the curved face down-ward the floor for a short time under the sunshine (if no sunshine, the time should be little more).
3. then you can find the Fir-wood revert to level.

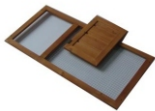

Before you begin:

- > **Read and understand instructions**
- > **Check that you have all components**
- > **Select a location for your Pet House**

Building House

- > Step 1: Repartition all sections, such as wire-nets frame/main side wall and run-room wall and so on
- > Step 2: Assemble the small door to the front frame elements.
- > Step 3: Prepare to build the main house.
- > Step 4: Assemble the back wall to the side frame.
- > Step 5: Upturn and assemble the front board with door.
- > Step 6: Upturn and insert the waterproof drawer and small hole board.
- > Step 7: Put the waterproof roof on and don't screw.

You now have a complete Rabbit Hutch. Carefully check it to make sure there are no exposed screw point
Cut and file down the edges of and exposed screws that could injure the pet.

Step 2 Assemble the small door to the front frame elements

Step 3 prepare to build the main house

Step 4 Assemble the back wall to the side frame

Step 5 Upturn and assemble the front board with door

Step 6 Upturn and insert the waterproof drawer and small hole board

Step 7 Put the waterproof roof on and don't screw
