# WE ARE STABLE AND WIRE-FREE

## Wireless Security Camera System

- 1080P HD Cameras
- Wireless & Auto-Pair
- IR-Cut Day&Night
- Email Alert & APP Push
- Remote Access
- IP66 Weatherproof

### Enjoy Wireless Freedom

Wireless systems have become increasingly popular in home and business security for they free you from complicated wiring issues. This 720P surveillance system is designed for do-it-yourself installation, yet we never compromise on video quality and system performance. 960P high definition video allows you to see all that matters in great detail while remote access makes sure you can watch live video, record and play back anytime anywhere. This system is ideal for daily home and business surveillance.

### NVR Specification:

- Video Compression: H.264+
- IP Video Input: 8CH Wireless
- Video Output: HDMI/VGA Up to 1080P
- Max Recording/ Playback Resolution: Up to 1080P
- Max Playback
- Channel/Capacity: 4CH/1080P
- HDD Capacity: 1 SATA interface, up to 6TB capacity
- USB Port: USB2.0x1
- Operating Power: DC12V

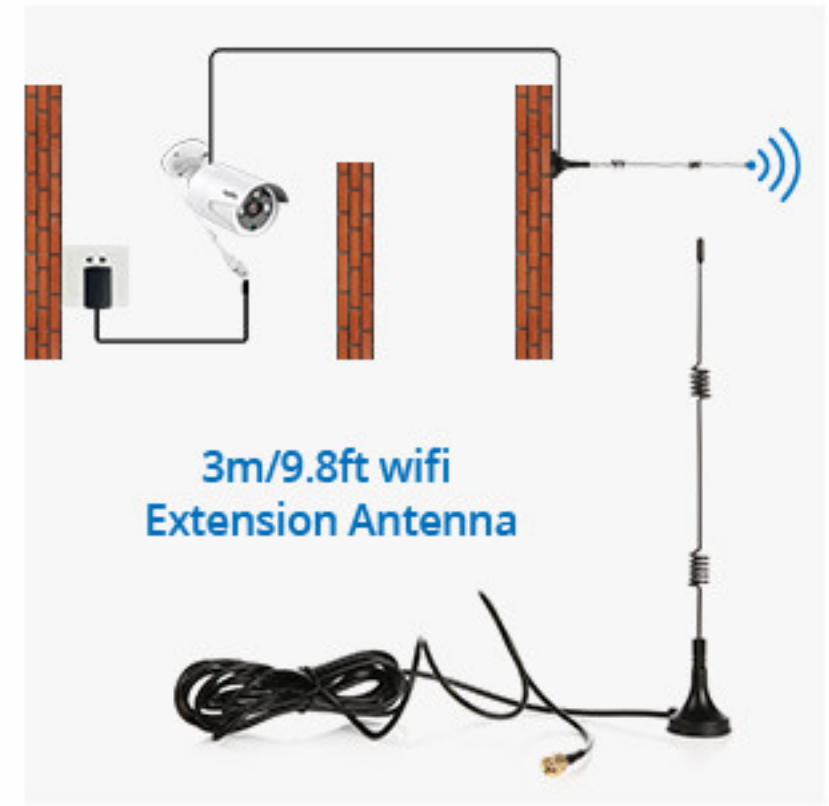

### Stable Point to Point Connection

The IP cameras are stably connected to the NVR in their own network by factory setting. You don't have to pair them again in installation. The distinct connection separates them from other devices on your network and frees the system from interference.

### Use One Camera as a Repeater

Some of your cameras may be installed far away from the NVR and receive weak signal. You can set one of the Wi-Fi cameras which is close to the NVR as a repeater to ensure the transmission stability between far-away (or weak signal) cameras and the NVR.

### Extend Signal with Wi-Fi Antenna

Our system also offers you another way to extend Wi-Fi signal. You can install the included extension Wi-Fi antennas onto these cameras, so that the transmission interruption caused by far distance or physical obstacles can be effectively avoided.

### Crisp 1080P HD Footage

Experience the stunning color and great details 1080P monitoring video brings. You have no need to strain your eyes in recognizing things. New array LEDs provide spectacular vision to help you keep burglars away at night.

### Quick Remote Monitoring

Consolidating your security system into your smartphone, tablet and PC can be quite simple with our free viewing app. Download "Sanace Sight" on your mobile devices, quick scan the QR-code to add the system, then you can watch live video from anywhere in the world.

### Smart Motion-Triggered Alert

As soon as motion detection is triggered, the system will automatically send out email alerts with snapshots and app alarm pushes. Thus, you can know whatever happens in your house and take appropriate precautions in time.

### IP66 Weatherproof Metal Housing

The security cameras are durable enough to withstand whatever mother nature brings, even in extreme temperature from -4 °F to 140 °F. As they are encased in airtight heavy-duty metal housing, you can always rely on their high performance, day in, day out.

### Camera Specification:

- Video Resolution: 1.3MP (1280x960)
- Image Sensor: 1/3" Progressive Scan CMOS
- Video Compression: H.264+
- Lens: 3.6mm Angle of View: 70°
- Number of Infra-Red LEDs: 3pcs Class A Array LED
- Night Vision Distance: Up to 100ft/30m
- IR Cut Filter: Support
- Operating Power: DC12V
- Operating Temperature: -4 °F - 140 °F / -20 °C - 60 °C
