### 1080p Full HD Images & 100 ft Night Vision

- \* ANNKE wireless security cameras, with the exceptional 2MP image sensor, deliver clearest 1080p images, much sharper than other 2MP cameras.
- \* 18 IR LEDs and the IR-cut filter help the WiFi IP cameras capture crystal footage in super low-light conditions, even from up to 100 ft away.

### Outdoor IP66 Waterproof

- \* With the outdoor IP66 waterproof, the CCTV IP security cameras can work in all extremely severe climates, regardless rain or shine, snow or sleet.
- \* The high-quality housing materials provide fast heat dissipation and low-power consumption. Stand firmly even after long-time operation without fading.

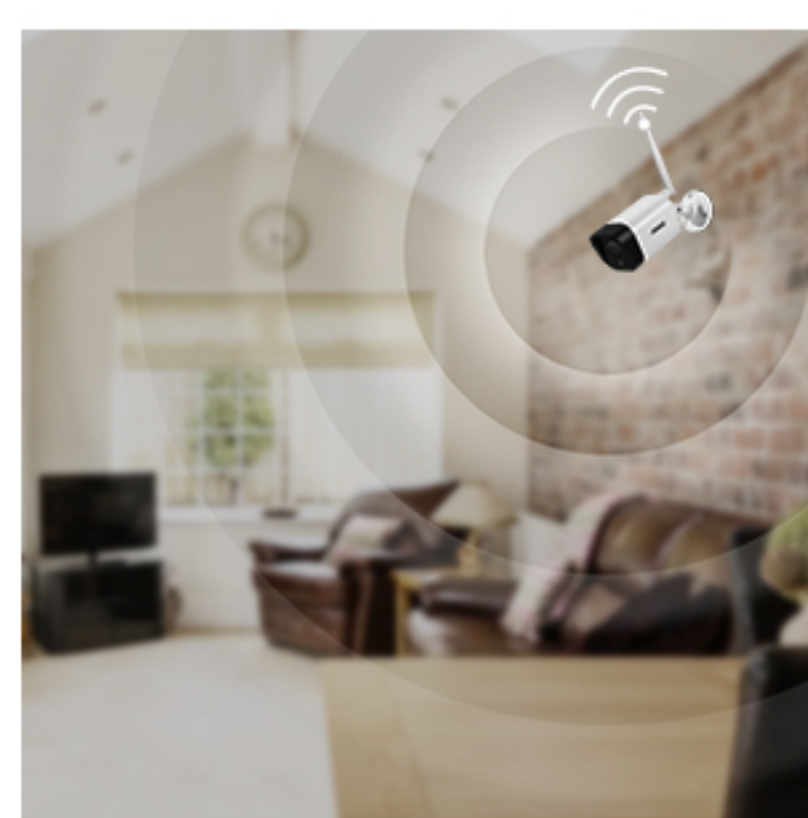

### Powerful H.264+ Wireless NVR

- \* With the advanced H.264+ coding, the WiFi NVR system provides faster stream and saves more storage space than H.264 systems.
- \* The WiFi NVR supports up to 5MP stream. Users can connect up to 5MP Super HD wireless security cameras to the NVR for clearer footage.

### Remote Access & Smart Motion Alerts

- \* Access the system for easiest management wherever you are. Keep tabs on your property remotely with your smartphone, tablet, PC or a browser when you are in the office or traveling.
- \* Customize the vital areas for accurate alerts. Get instant app pushes and email alerts with snapshots only when motion events happened in the customized areas.

### Up to 300 ft Wireless Connection

- \* The 4 WiFi IP cameras and the NVR connect to each other via their proprietary network signal (up to 300 ft in open areas).
- \* Users can take the IP camera that is closest to the router as the WiFi signal booster to extend the connection distance between other cameras and the NVR (up to 1,000 ft in open areas).

### Easiest Plug and Play Setup
