Assembly Preparation

Owner's Manual

Please check local building codes regarding footings, location and other requirements before beginning construction.

Assembly instructions:

Reviewing all instructions and the appropriate information before you begin, make sure following the step sequence carefully for successful results.

Flooring base:

A good location for the storage building is a square and level area with good drainage. The base is not included in the kit which may need purchase separately or may construct a foundation and anchoring system of your own.

A strong plastic sheet (thickness: at least 150µm) should be placed under the foundation to assist in reducing rising dampness from the soil, thus reducing condensation build up in the shed. Your storage building must be anchored to prevent wind damage. Once secured, it is highly recommended applying silicone along the inside of the base rail to minimize condensation.

Parts and Parts List:

Before you start, separate and identify all the parts and hardware to be sure that you have all the necessary parts for your building (refer to the Parts List Page).

If you find that a part is missing, please notify the seller within one week after receiving the product. Do not attempt to assemble the building if parts are missing because any building left partially assembled may be seriously damaged by light winds.

Tools you need:

(Please tear off the safety protection layer before the assembly, keep the part number label if needed)

Safety must be put in the No. 1 position:

1. Select a dry and calm day for your assembly. Team works (Two or more people) are required during the assembly. It is also recommended to finish the assembly in a day to avoid damage to the product or missing of some small parts.
2. Wearing safety gloves, eye protection and long sleeves during the assembly to prevent injury. Pay attention to the sharp edge of some parts.
3. Children and pets are not allowed entering into the construction site.
4. Never concentrate your total weight on the roof of the building.
When using a step ladder make sure that it is safe.

Care & Maintenance:

1. Keep the shed clean with soft cloth, use water if necessary.
2. Keep the door tracks clear of dirt and other stuff that prevent them from sliding easily.
3. Clean the snow with necessary tools to make sure it is safe to enter into.
4. The shed is not made for living but storing stuff.
5. Please add some oil on the top and bottom door sliding channel to make door slides smoothly.

Montagevorbereitung

Bedienungsanleitung

Bitte überprüfen Sie vor Beginn der Bauarbeiten die örtlichen Bauvorschriften in Bezug auf Fußböden, Standort und andere Anforderungen.

Montageanleitungen:

Überprüfen Sie alle Anweisungen und die entsprechenden Informationen, bevor Sie beginnen. Stellen Sie sicher, dass Sie die Schrittsequenz sorgfältig befolgen, um erfolgreiche Ergebnisse zu erzielen.

Bodenbelag:

Ein guter Standort für das Lagergebäude ist ein quadratischer und ebener Bereich mit guter Entwässerung. Die Basis ist nicht im Bausatz enthalten, die separat erworben werden muss oder kann ein eigenes Fundament und Verankerungssystem bauen.

Eine starke Kunststoffplatte (Dicke: mindestens 150µm) sollte unter dem Fundament platziert werden, um die aufsteigende Feuchtigkeit aus dem Boden zu reduzieren und somit die Ansammlung von Kondenswasser im Stall zu reduzieren. Ihr Lagergebäude muss verankert werden, um Windschäden zu vermeiden. Nach der Befestigung wird dringend empfohlen, Silikon auf der Innenseite der Basisschiene aufzutragen, um Kondensation zu vermeiden.

Teile und Teileliste:

Bevor Sie beginnen, trennen und identifizieren Sie alle Teile und Hardware, um sicherzustellen, dass Sie über alle notwendigen Teile für Ihr Gebäude verfügen (siehe Seite "Teileliste").

Wenn Sie feststellen, dass ein Teil fehlt, benachrichtigen Sie bitte den Verkäufer innerhalb einer Woche nach Erhalt des Produkts. Versuchen Sie nicht, das Gebäude zu montieren, wenn Teile fehlen, da jedes Gebäude, das teilweise zusammengebaut wurde, durch leichte Winde schwer beschädigt werden kann.

Benötigte Werkzeuge:

(Bitte entfernen Sie die Sicherheitsschutzschicht vor der Montage, bewahren Sie bei Bedarf die Artikelnummer auf)

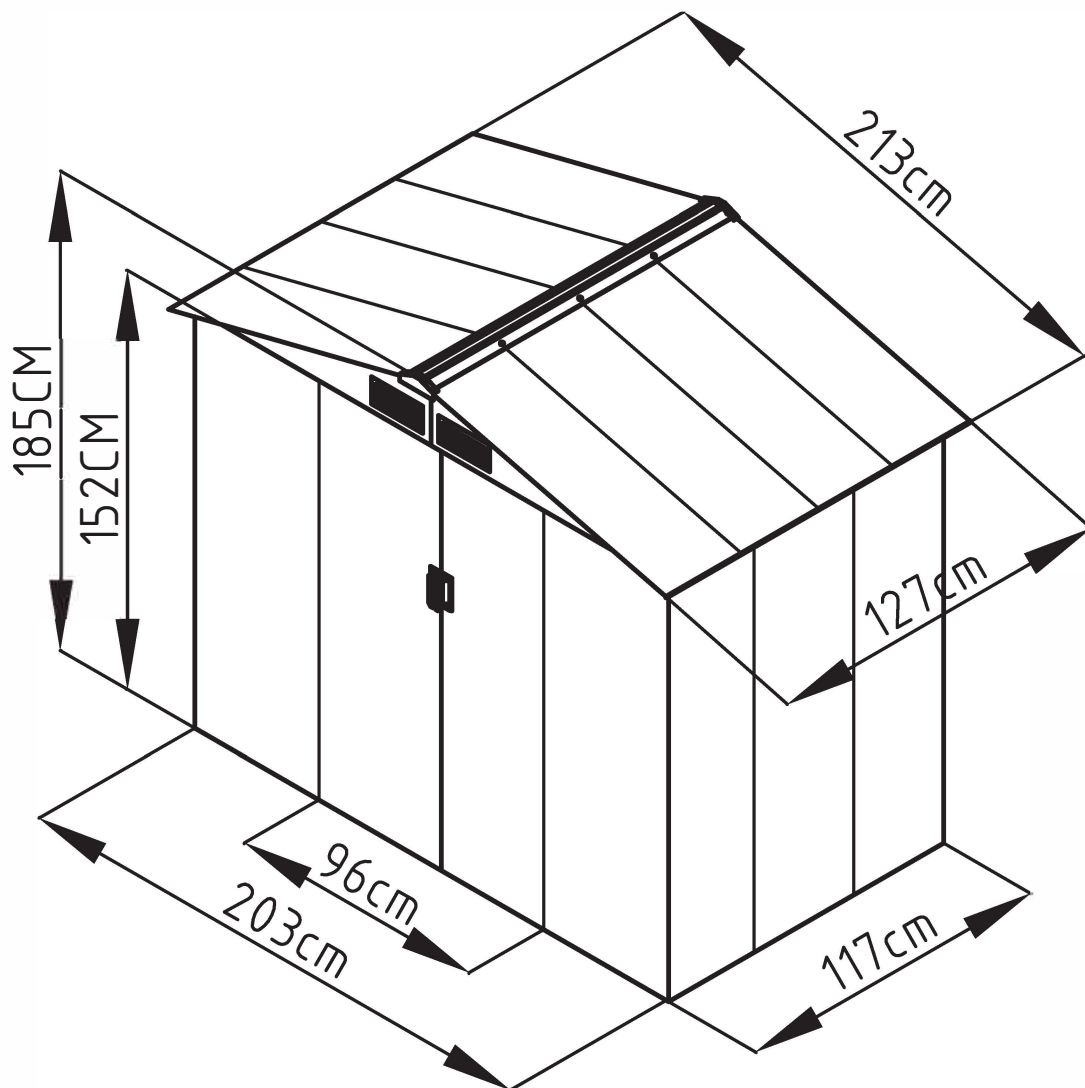

Sicherheit muss in die Nr. 1 Position gebracht werden:

1. Wählen Sie einen trockenen und ruhigen Tag für Ihre Montage. Teamarbeiten (zwei oder mehr Personen) sind während der Montage erforderlich. Es wird auch empfohlen, die Montage an einem Tag zu beenden, um Schäden am Produkt oder das Fehlen von Kleinteilen zu vermeiden.
2. Tragen von Schutzhandschuhen, Augenschutz und langen Ärmeln während der Montage, um Verletzungen zu vermeiden. Achten Sie auf die scharfe Kante einiger Teile.
3. Kinder und Haustiere dürfen die Baustelle nicht betreten.
4. Konzentrieren Sie niemals Ihr Gesamtgewicht auf das Dach des Gebäudes. Stellen Sie bei Verwendung einer Trittleiter sicher, dass es sicher ist.

Pflege und Wartung:

1. Halten Sie den Schuppen mit einem weichen Tuch sauber, verwenden Sie wenn nötig Wasser.
2. Halten Sie die Türschiene frei von Schmutz und anderen Gegenständen, die verhindern, dass sie leicht verrutschen.
3. Säubern Sie den Schnee mit den notwendigen Werkzeugen, um sicherzustellen, dass es sicher betreten werden kann.
4. Der Schuppen ist nicht zum Wohnen gedacht, sondern zum Aufbewahren von Sachen.
5. Bitte fügen Sie etwas Öl auf den oberen und unteren Türgleitkanal hinzu, um die Tür gleitend zu machen.
